INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/IB 03/01295

v.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability citations and explanations supporting such statement

Statement			
Novelty (N)	Claims	1 11	
	-	1-11	YES
	Claims		NO
Inventive step (IS)	Claims	1-11	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-11	YES
	Claims		NO

2. Citations and explanations

The examination statement is made on the basis of claims 1 to 11, as amended on 09 November 2004, in the light of the documents cited in the search report:

D1: US 5 024 838 A (1991-06-18)

D2: WO 00/37037 A (2000-06-29)

D3: WO 93/20838 A (1993-10-28)

D4: WO 98/53850 A (1998-12-03)

Document D1 relates to a topical composition in the form of a gel for treating skin, including an antiseptic, sapogenin, a proteolytic enzyme (papain) and a thickening agent (carboxymethylcellulose).

D2 relates to a topical composition in the form of a gel for treating skin burns, including one or more organic acids (acetic acid, citric acid), a plant-based agent, a protective agent (carbopol) and an anaesthetic agent.

D3 relates to a topical composition for treating skin burns and wounds, in the form of a hydrophilic gel or in the form of a gel in combination with a water-soluble polymer, and including a proteolytic enzyme (papain).

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/IB 03/01295

D4 relates to a topical composition for treating skin, including a proteolytic enzyme (papain).

An analysis of the prior art (D1 to D4) shows that it does not include an indication of the composite composition as per amended claim 1. Furthermore, none of the cited documents includes information on the presence of an emulsifier (triethanolamine) and a preservative (methyl paraben and propyl paraben) in therapeutic compositions.

Given that the composition according to claim 1 is not known or obvious and has an effective pain-killing activity as well as protective, wound-healing and anti-inflammatory activities, claims 1 to 9 comply with the requirements of novelty and inventive step. Claims 10 and 11 also comply with the requirements of novelty and inventive step because they refer to claims 1 to 9.

Claims 1 to 11 comply with the requirement of industrial applicability.
